TECHNICAL PROJECTS

ReelRave Movie Review Website | **Lead Developer** | May/2024 |
https://6642b56bb6e8721ac618194e--sprightly-sorbet-8f6ed8.netlify.app/

A movie review website that allows users to create an account and read and post reviews on movies they've watched. Users can also browse through movies on the site and read reviews other users have posted or see a brief description of a particular movie. Users also have the option to give a rating to the movie and view an overall rating a movie has.

- Developed with the PERN stack, Bootstrap and Render
- Created and seeded the database with our data and created all routes for our API for the backend
- Designed and implemented the admin view for the frontend using authentication
- Styled the entire site using css and bootstrap
- Designed and implemented the search bar allowing users to search for movies

Puppy Bowl Project | **Developer** | March/2024 | https://github.com/jessiskyy/Unit2.PuppyBowl.Starter
- Designed and implemented the roster page allowing users to view roster, see player details and add players to roster
- Developed with Javascript, HTML, and CSS
- Built out functional client side, requested data from API, and rendered data on the frontend

Clever Read Public Library Service | **Developer** | April/2024 | Link to the project
- Built the frontend of the online public library service BookBuddy for career simulation school project
- Developed with React, JavaScript, HTML, CSS and Bootstrap
- Designed components to allow users to view a list of all library books, filter books with a text matcher and view details of an individual book
